

South Florida
WILDLIFE CENTER
Saving Wildlife in Our Urban Jungle

CORPORATE SPONSORSHIP PACKAGE

AN ANNUAL PARTNERSHIP WITH SOUTH FLORIDA WILDLIFE CENTER

(954) 524 - 4302 • 3200 SW 4TH AVE FORT LAUDERDALE FL 33315
WWW.SOUTHFLORIDAWILDLIFECENTER.ORG

THANK YOU

As a supporter of the South Florida Wildlife Center, your sponsorship will provide crucial, lifesaving support to South Florida's native animals. Our mission is to rescue and rehabilitate sick and injured wildlife for release and educate the community about our wild neighbors. For more than 54 years, we have been a critical community resource for wildlife and the citizens of South Florida by treating over 6.5 million total patients.

Why Sponsor Us

This partnership will directly support:

- SFWC's operations to admit and treat over 8,000 animals annually
- Our state-of-the-art hospital, which is complete with a surgical suite, Intensive Care Unit, diagnostic equipment, medications, and medical supplies
- The Rehabilitation habitats specifically designed to mimic natural settings for each species to prepare for release into the wild
- Our Outreach & Educational programs and initiatives for the community and schools, with engaging in-person or online presentations
- Support maintenance for our Rescue Ambulances and Outreach vehicle

We do not receive financial support from the state or local government agencies. This lifesaving work is only possible with the generosity of people and organizations like you!

We are grateful for your compassion for wildlife and your partnership.

ANNUAL SPONSORSHIP OVERVIEW

The South Florida Wildlife Center was founded to care for native wildlife in the Miami-Dade, Broward, and Palm Beach counties. We are the highest-volume wildlife hospital and rehabilitation facility in Florida, treating 8,000 - 10,000 animals annually from nearly 300 different species. We are also an internationally recognized teaching hospital that has helped train hundreds of rising veterinary professionals over the years. By becoming a sponsor, you are contributing to wildlife conservation today and for its future.
